Short synopsis in English

The forest and its inhabitants are suffering under a terrible drought. The ponds are drying up and the situation is hopeless. The only one who refuses to stand by passively is Latte the little girl hedgehog. She decides to set out on a dangerous journey to take back the magic waterstone from the claws of Bantur, the Bear King, and thereby end the drought. However, before Latte can confront the dreadful Bear King, she must first pass through the forest and the realm of the devious wolves. To her great irritation, Latte is being accompanied on her adventure — by none other than Tjum, the squirrel.. These two could not be more different. Grudgingly, these two squabblers come to recognize that the only way they can survive the breathtaking dangers on their journey, is to stick together. The perilous journey ends well and the two manage to bring the water-stone back to their forest. In addition, not only does Latte gain a new friend, but also a family.
