Short synopsis in English

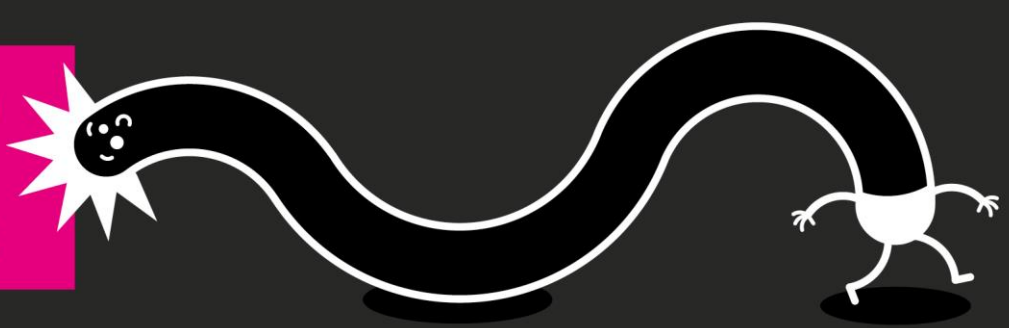

Through mysterious circumstances, science-wunderkind Zoe is transported into the future where she accidentally kills her twin brother Adam, which is then a grandpa. Zoe is now a wanted fugitive and must escape the law, all while trying to contact Adam in the present to help her get back home. They know nothing about future evil Adam and how their parents are connected to the secret organization that's trying to hunt them down. Together, separated by time, Zoe and Adam embark on a quest to solve the mysteries while navigating the chaos of an ever changing future. A dark-humored comedy, Frickin'Times sends us on a wild ride through space and time, filled with pop cultural references and a heartwarming dysfunctional family story at its core.
